Supporting Participation and Communication with Video Visual Scene Displays

Salena Babb, David McNaughton, Sejung Jung,
Ciara Ousley, & Janice Light
Pennsylvania State University

Community settings

- Participation supports
- Communication supports

Participation supports

- Video models

Video Visual Scene Displays = Video modeling + communication supports

- Watch the video until a “pause” (still image)
  - Cue to perform step
- The still image is a Visual Scene Display
  - Can be programmed with hotspots
“L”
- ? Age
- Diagnosis of ASD
- Echolalia
- Prompt dependent

Goals
- Increased independence in pre-vocational and community activities

Video Visual Scene Displays = Video modeling + communication supports
- Watch the video until a “pause” (still image)
- Cue to perform step
- The still image is a Visual Scene Display
- Can be programmed with hotspots

S.T.A.R.S
- S – Select a key activity and Create a task analysis
- T – Take video
- A – Add VSDs
- R – Record communication
- S - Support its use with a model/guided practice/independent practice instructional sequence
- I - celebrate success and make changes as needed

S – Select a key activity and Create a task analysis

• Employment
• Communication

S – Select a key activity and Create a task analysis

Activity: Putting books away

1. Draft list of the steps
2. Perform the task
3. Revise draft

1. Perform again

T – Take video

• Record someone completing each step in the task analysis
• Use the tablets camera

S – Select a key activity and Create a task analysis

1. Ask to put the books away: Can I put the books away?
2. Pick up the box of books
3. Bring the box to the table
4. Empty the books on to the table
5. Sort the books into piles based on categories
6. Ask a staff member to check your work: Can you check my work?
A - Add VSDs

• Pause the video

• Create a VSD (still image)

• Some will include speech, some will not

S - Support its use with a model/guided practice/independent practice instructional sequence

• Model

• Guided Practice

• Independent Practice

R – Record Communication

• Hotspots

• Words or phrases

! - Celebrate success and Make changes as needed
Results: Putting Away Books/Sorting

• **Baseline**: > 5% over 6 Baseline sessions

• **Intervention**: average of 90% across 3 sessions

S - Support its use with a model/guided practice/independent practice instructional sequence
I - celebrate success and make changes as needed

The full success of AAC intervention is best evaluated not by a single performance under controlled conditions,

but rather by the extent to which it improves access and participation in valued activities and experiences of everyday life.
Technologies currently available

Snap Scene
Supports the use of still VSDs with embedded hotspots
